

THE DIRECTOR OF CENTRAL INTELLIGENCE

WASHINGTON, D.C. 20505

Office of the Deputy for the  
Intelligence Community

DCI/IC 1522-74

12 August 1974

X1 MEMORANDUM FOR: [ ] DIA/DP-2C

SUBJECT : CIRIS/IMIS INTERFACE

X1 1. On 8 August 1974, [ ]  
of your staff and [ ] of Informatics to  
discuss the CIRIS/IMIS interface. 25X

X1 2. [ ] had a series of questions which I promised to  
obtain answers to as soon as possible. This memorandum contains  
the answers to her questions. Would you please see that the infor-  
mation is forwarded on to her.

X1 3. In addition to answering [ ] questions, I am also  
attaching an up-to-date list of CIRIS input and internal computer codes.  
An up-to-date entity list will be sent to you as soon as [ ]  
[ ] data is received. 25X 25X

X1 4. Please advise [ ] that she is correct in understanding  
that you are unable to identify that portion of Milpay in the 2812  
summary records that covers officers or enlisted men. The Milpay  
dollar amount represents all military salaries combined. The same  
applies to Civpay in the summary records. The figure represents  
all civilian salaries and does not distinguish between one type of  
civilian and another. However, this type of information is found in  
the detail records. [ ] recognized this fact. In addition,  
the detail records also distinguish one military service from another.

X1 5. Secondly, as confirmed by [ ] only summary (2812)  
and detail (2812A) dollar and manpower data is to be submitted on  
magnetic tape by IMIS to CIRIS. Descriptive data (2812B) will 25X 25X

continue to be submitted on hard copy. When CIRIS data is transmitted on magnetic tape to IMIS, descriptive data will be included only when specifically requested by DIA. Standard labels should be included on tape files in all cases.

6. VUPDATE field in the E (2812) and M (2812A) VIR records (position 201) should be left blank. The field VFORMAT (position 235) should contain an X. The field VERROR, (position 237) should contain a blank. The field VSEQ-NO should begin with 010106 and ascend in consecutive order. The summary (E) records should appear first in an entity followed by the detail (M) records. All records should be in fiscal year order within their record group (E or M) with the lowest fiscal year first.

7. The VSUB-ELEMENT field (position 209-210) should be blank. The VAGENCY-NUM field (positions 232-233) should be given the numeric representation (see attached codes) for the agency attached to the Program Element number. The VPROC-SUBCODE should contain a 0 whenever the function field (VFUN, position 18-23) is not processing (02). When the function is processing, the VPROC-SUBCODE should contain a 1.

8. At a later date we will also furnish you with a GDIP/SRV VIR file for testing of the CIRIS to IMIS interface. We would also like to receive from you an IMIS to CIRIS test file when one is available. In the meantime, if [ ] have any additional questions, please have them contact me.
